

- What do I want to learn or understand better?

Our project is now starting to come to an end as we have fulfilled most of the epics that our product owner wanted us to work towards. Except for fixing a few bugs we are soon going to focus on writing the report. The thing I want to get better at is therefore mainly reflecting on the Scrum process and in analyzing what could have been done better.

- how can I help someone else, or the entire team, to learn something new?

If I know something I share that knowledge with the team members in our chat or at the team meetings.

- what is my contribution towards the team's use of Scrum?

I am filling in the KPI:s, for example the effort estimation before taking on a user story so that we are able to evaluate our work each sprint and better our process for every sprint

- what is my contribution towards the team's deliveries?

This sprint me and Gabriel finished the Game Over menu, the pause menu and also fixed a bug with the life counter. These were things that were of high priority to our product owner.
